[Youth suicide prevention referral and tracking toolkit \(1.29 MB\)](#) [1]

This toolkit has been created to help school personnel involved in school-based suicide prevention and intervention to (1) track youth identified and referred for risk of suicide and (2) use that information to inform and evaluate suicide prevention practice. It is based on the lessons learned from the Maine Youth Suicide Prevention Program's (MYSPP) implementation of a comprehensive approach to suicide prevention. The toolkit is organized into two parts: (1) Facilitating good data collection and use and (2) Additional resources and background.
