Juvenile justice resources [1]

The Youth in Contact with the Juvenile Justice System Task Force, established in June 2011, completed its work in 2013 by focusing attention on the needs of youth in the juvenile justice system, particularly in the areas of suicide-related awareness and education, suicide research, suicide prevention programming and training, and collaboration between the juvenile justice and mental health systems. These are the resources developed to provide findings, recommendations, and practical tools for juvenile justice and mental health administrators and staff.
