Transforming communities: Key elements for the implementation of comprehensive community-based suicide prevention

Date: 2017 (For resources, this is the publication date. For programs, this is the date posted.)

Developed by the Action Alliance, this resource presents seven key elements that should guide program planning and implementation. It is being jointly released with the CDC’s Preventing Suicide: A Technical Package of Policy, Programs, and Practices, which outlines specific, evidence-based suicide prevention strategies for communities to consider as part of their comprehensive approach.
