SAMHSA’s Evidence-based practices resource center

Date: 2018 (For resources, this is the publication date. For programs, this is the date posted.)

Information

Type: Database
Author: Substance Abuse and Mental Health Services Administration (SAMHSA)
Publisher: Substance Abuse and Mental Health Services Administration (SAMHSA)

See This Resource

This Resource Center contains a collection of science-based resources for a broad range of audiences. The resources include Treatment Improvement Protocols, toolkits, resource guides, clinical practice guidelines, and other resource types. Users can search by topic area, substance, or condition, as well as by resource type, target population (e.g., Youth, Adult), and target audience (e.g., resource for Clinicians, Prevention Professionals, Patients, Policymakers). This Resource Center is especially useful for identifying resources relevant to the effective care and treatment of people with serious mental illness, a population that is at higher risk for suicide.
