Treating Suicidal Patients during COVID-19: Best Practices and Telehealth

April 24, 2020
News Type: Weekly Spark, Weekly Spark Announcement

SPRC’s webinar on treating patients at risk for suicide during COVID-19 is now archived online [1]. Presenters discuss three best practices in suicide care that can be delivered easily and effectively via telehealth: (1) safety planning, (2) treatment that directly targets thoughts of suicide, (3) and dialectical behavior therapy-based self-help skills and resources. The webinar archive includes PowerPoint slides and supplemental resources.
