WHO ARE WE?

The Lifeline is the nation's public safety net for all American residents in emotional distress or suicidal crisis.

The Lifeline was established in 2005 by SAMHSA.

Through its toll-free number (800-273-TALK), the Lifeline is a national service designed to seamlessly connect persons in each state to locally financed and operated crisis centers, so they are able to get the best care, nearest to them.

This year, the Lifeline's network of over 160 local centers will answer over 2 million calls.

WE BELIEVE

1. Healing, hope, and help can happen.

2. We can all take action to prevent suicide.

3. Local crisis centers are critical partners in all community suicide prevention.

MINNESOTA MEMBERS

In Minnesota, there are 0 crisis centers which are a member of the Lifeline...
MINNESOTA HIGHLIGHTS

The Lifeline is a local and national safety net for people in crisis, with one easily recognizable national toll free hotline.

In the last six months of 2019, there were 16,087 callers from Minnesota to the Lifeline.

Of those 16,087 callers, 0% were able to receive help in Minnesota.

Which means that 16,087 callers from Minnesota, were unable to be answered by a local center in Minnesota.

Where are the callers from Minnesota being answered?

Callers from Minnesota are better served by their local crisis centers. However, if the nearest center to the caller is busy, Lifeline network backup centers in other regions across the United States make their best efforts to answer these calls.

This chart shows total annual call volume from Minnesota for the last five years.

This chart shows where the callers from Minnesota were answered between July and December of 2019.
OUR GOALS

Why is it important that your state support local Lifeline crisis centers?

Best Practices in Crisis Care

The clinical care task force for the National Action Alliance finds that best practices in suicide care have not been implemented in all crisis settings*. Being a member of the Lifeline ensures that your state is meeting standards established by SAMHSA funded evaluation of crisis centers*. These evaluations show Lifeline centers significantly reduce emotional distress and suicidality in callers. All Lifeline centers are required to be accredited and adopt industry standard practices based on research and national expert consensus. Recent research by Rand* shows that Lifeline centers do a better job of assessing risk and reducing distress in callers than non-Lifeline crisis centers.

Cost Effective Means to Fill in Gaps of Care

Aside from research showing that Lifeline centers reduce suicidal and emotional distress in callers, Lifeline centers in your state can better ensure that Minnesota callers “go through the right door” for local care. Local Lifeline crisis centers reduce the burden on your emergency rooms, police, and emergency responders, as well as your behavioral healthcare providers, who often must step in when emotional crises escalate. The centers also provide a safety net in the absence of other affordable community resources. People in crisis can easily use hotlines to access help when other mental health, substance abuse, and social services have eligibility restrictions, are unavailable in rural areas, are inaccessible during late-night hours, or no longer operate because of budget cuts.

QUESTIONS?

Your callers in crisis deserve the best help they can receive – and they deserve to receive it in their own state, from providers who know where the best care is to support their local needs. Support your local crisis centers.

* Studies indicate that crisis hotlines play a critical role in ... the mental health system. Crisis hotlines could also be utilized to provide monitoring or tracking of patients after hospital treatment for a suicide attempt. Crisis hotlines deserve the active support of the SMHA to ensure high quality, cost-effective services are consistently available to all residents of the state.
